Repository Dogs = https://github.com/diegop1zarro/proyect-Dogs

Full Stack Web Developer – Henry-Shoes
Henry Bootcamp, Buenos Aires, Argentina.

- This project is an E-commerce of shoes that I did together with 4 more colleagues for Henry's final project, on this page we will have the option to log in, include products in our shopping cart, we will have the option to enter our user panel, see the purchases or orders that we create, edit our profile, we will also have an administrator panel, to be able to create new products, edit them, as well as add new categories, brands, frequently asked questions, we will also have the option of modify the status of our clients' orders, change the user from client to administrator, etc.
- We develop the app using React, Redux, HTML, CSS, Bootstrap, Material UI, Auth0, Mercadopago, Nodemailer, Node.js, Express. Database in PostgreSQL and Sequelize.
- My performance was oriented more than everything in the Front of the project.
